

Accessories for

NIKON Z50

FTZ MOUNT

This is an absolute necessity if you have lenses you used with either a DX Mount or F Mount cameras.

I dont have any Z mount lenses. So, I never take my FTZ Mount off

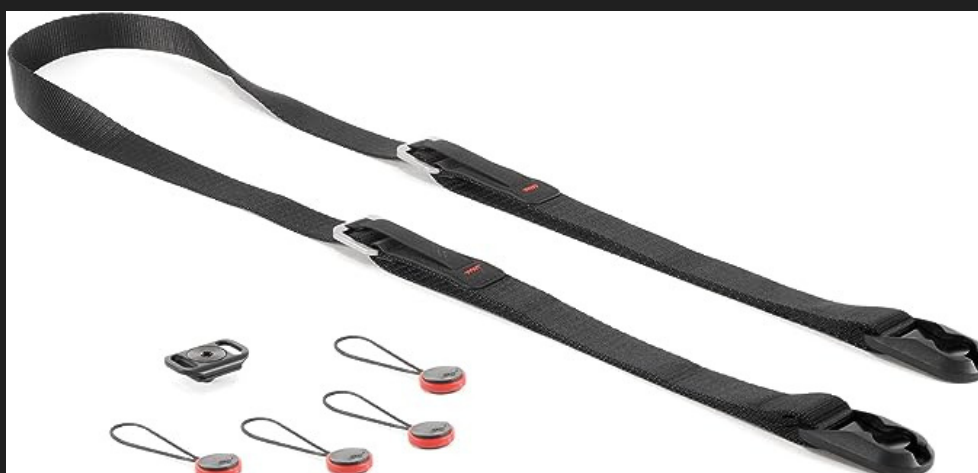

SHAPE SHIFTER 17

I went through about 3 cheap bags until I found this Think Tank Shape Shifter 17 bag a couple years ago.

I was worried about the price at first. But, once I realized it's been with me for the better part of two years with no signs of slowing down.

It's awesome!

PEAK DESIGN STRAP

This is my go to camera strap. I have a Black Rapid Strap. But, I only use it when I'm shooting sports, and have two cameras. The Black Rapid is a bit more clunky than I desire. Where as this Peak Design Strap can be clicked into and out of action quickly, and is not clunky.

It never get's in the way of my shooting, does exactly waht it needs to do. But isn't big which I find to be distracting from the Black Rapid Straps.

MEMORY CARDS

I use these 64 gb cards. I do not shoot video. For photography it works perfectly.

I have around 30 of these guys! I like to get through my full photo season without having to delete any of the cards until the photos have all been delivered to my clients.

I shoot sports with these as well. I have never once said my card is too slow. Even at 14 frames per second!

Honorable Mention

Tamron Tap-in Console for Nikon Lenses. This is only if you have a Tamron Lens. If you have a Tamron lens that you want to use. You have to this to update your Tamron Lens to work wit the FTZ Adapter. Only used it once. But the 70-200 I use all the time! Click the text. It'll take you to Amazon!
